Subject: RE: PFOS & PFOA

ME currently offers accreditation for DW EPA 537, but not the modified EPA 537.

Also, I will be getting in touch with Con-Test today, as I am unable to find a record of when they received accreditation from Maine for EPA 537. Like Bill said, their information may not be totally accurate.

NH ELAP offers accreditation for DW EPA 537 and Modified EPA 537 at this time.

Some of our state agencies are trying to determine what to require if they actually require accreditation in NH.

Con-Test is in the process of gaining this accreditation from NH. Their information may not be totally accurate.

FYI

Hi folks after all the conversations we had about the above I wasn't aware that RI was certifying the perfluorinated organics.

CT still hasn't but some of the PWSs in CT have received the below notice from Con-Test. We will have to contact the Director

at Con-Test.

I can understand maybe ME and NH granting cert since they are TNI.

Hello

My name is Ashley Sisk from Con-Test Analytical Labs. I wanted to introduce myself. I know you've used Con-Test for some subcontract work in the past and wanted to reach out to see if there is any projects that we can support you on. I hope you were satisfied with our previous work.

We are now officially certified to conduct PFOA testing in CT, ME, NC, NH, NY, RI and VA, as we are one of the only labs in New England and NY certified to analyze PFCs. If you have a project coming up that you need pricing on or have work that you need to sub out I'd be glad to provide you a quote.

I have attached a one pager on our capabilities. Hope to hear from you soon!

Thank you

Ashley Sisk
